Experience

Software Developer Feb 2026 – Present
IDLMeals *Fort Worth, TX (Remote)*

- Designed **Spring Boot Kafka** consumers that push backend state changes to **React** clients over **WebSockets**, replacing polling; cut API requests by **80%** and update latency from **3s to 70ms**
- Troubleshot a pre-existing race condition in the claim flow that real-time push would amplify; diagnosed the root cause, fixed it with an atomic conditional update, and documented the fix
- Wrote **80+ JUnit/Mockito** tests for the WebSocket migration, raising code coverage from **61%** to **90%**; confirmed with access logs that no clients still used the legacy endpoints, then removed obsolete code
- Evaluated and adopted **Web Workers** and virtualized rendering to re-engineer a data intensive **React/JavaScript** workflow, moving expensive computation off the main thread and cutting interaction latency from **420ms to 110ms** on datasets of **50K+ records**

Software Developer Intern (Co-op) Feb 2025 – May 2025
IpserLab *Fort Worth, TX*

- Analyzed user needs with engineers as end users, then prototyped and built an internal diagnostics dashboard in **React** and **Java/Spring Boot** aggregating service health, failures and deployment metadata across **12+** services, reducing troubleshooting time from **20 to under 10 minutes**
- Automated test data setup with a **Java/Spring Boot** data loader, cutting manual setup from **10 minutes to a few seconds** for the whole team
- Identified and fixed a mobile animation stutter on the production site by replacing position-based animation with **GPU accelerated CSS transforms**, raising frame rate from **25fps to a steady 60fps**
- Developed **13** reusable **React** components and centralized API calls in custom hooks across **5** screens, cutting screen code by **18%**

Software Development Engineer Jul 2022 – Aug 2023
Netzwerk.AI *Gulbarga, India*

- Decomposed **3** high-traffic **Java/Spring Boot** workflows into independently scalable services, offloading downstream processing through **Kafka** and horizontally scaled **Kubernetes** workers to isolate failures and increase peak throughput by **2.4**×
- Established **CI/CD** pipelines with **Azure DevOps**, Docker and Azure, automating builds, testing, static/dependency/container scanning, artifact publishing and deployment; cut release time from **40 min to 9 min** and increased deployment frequency from **2 to 5+ releases/week**
- Engineered centralized observability using **Azure Monitor**, **Application Insights**, structured logging and distributed tracing; reduced mean time to detect production failures from **18 to 5 minutes** and improved root-cause analysis in incident postmortems
- Partnered with product and QA to deliver **6** production features across the full **SDLC**, from requirements analysis and technical specifications to design reviews, testing and release; translated business requirements into working software, flagged delivery risks early and gave stakeholders timely project updates

Projects

Feed Share | *Java, Spring Boot, Hibernate, MySQL, AJAX*

- Built a full stack platform using **Java**, **Spring Boot**, **Hibernate** and **MySQL** that let Northeastern students post and discover leftover food from campus events through a live, **AJAX**-updated feed

Inventory Management App | *ASP.NET Core, C#, Dapper, AutoMapper, JavaScript, jQuery*

- Built an inventory CRUD app with **ASP.NET Core**, **Dapper** and **AutoMapper**, plus **jQuery** AJAX frontend

Technical Skills

Languages: Java 17, Jakarta EE, Python, C#, JavaScript
Frontend: React, React Native, jQuery, HTML/CSS
Backend & APIs: Spring Boot, Spring Security, Hibernate, Spring Data JPA, Maven/Gradle, REST APIs, JWT
Databases & Messaging: SQL, PostgreSQL, MySQL, MongoDB, Redis, Kafka, WebSockets
Cloud & DevOps: Azure, Azure DevOps, Docker, Kubernetes, CI/CD, Linux, Git, GitHub Actions
Practices: Agile, Object-Oriented Programming, Unit/Integration Testing, Debugging & Troubleshooting

Education

Northeastern University Boston, MA
Master of Science in Information Systems *Sep 2023 – Dec 2025*

Visvesvaraya Technological University Belgaum, India
Bachelor of Engineering in Electronics and Communication Engineering *Aug 2018 – Jun 2022*
