

Rishab Shukla

857-318-8943 | rishabjshukla@gmail.com | linkedin.com/in/rish-shukla | github.com/rishabshukla-code | Boston, MA

TECHNICAL SKILLS

Languages: Java (SE/EE), Python, JavaScript, TypeScript, C/C++
Backend & APIs: Spring Boot, Spring Security, Hibernate, Node.js, Express.js, REST APIs, OAuth2, JWT
Databases: PostgreSQL, MySQL, MongoDB, Redis, Kafka, SQS
Cloud & DevOps: AWS(EC2, S3, RDS, CloudWatch), Docker, GitHub Actions, CI/CD, Linux, Git
Testing & Observability: JUnit, Mockito, Prometheus, Grafana, Distributed Tracing, Structured Logging

EXPERIENCE

Software Engineer

Feb 2026 – Present

IDLMeals

Fort Worth, TX

- Re-engineered a data intensive retrieval layer by replacing full entity database queries with JPQL projections, indexed lookups and request driven field selection, reducing API payload sizes by 90% and improving median response time from 780ms to 320ms on frequently accessed endpoints
- Optimized a data matching pipeline with hash based lookups and batch processing, reducing complexity and processing time from 4.2s to 900ms across 10,000+ records
- Implemented 80+ unit and integration tests, increasing code coverage by 35% and uncovering untested legacy code; partnered with a senior engineer to assess usage and safely remove obsolete functionality
- Leveraged AI-assisted tools to analyze errors across unfamiliar areas of the codebase, accelerating root-cause identification, bug resolution and documentation workflows by 30%

Software Engineer Intern

Feb 2025 – May 2025

IpserLab

Fort Worth, TX

- Identified and fixed a mobile animation stutter on the production site by replacing position-based animation with GPU accelerated CSS transforms, raising frame rate from 25fps to a steady 60fps
- Automated test data setup with a Spring Boot data loader, cutting manual setup from 25 minutes to a few seconds for the whole team
- Developed 13 reusable React components supporting multiple application workflows, integrating asynchronous APIs and accessible UI patterns while reducing duplicated frontend logic by 30% across 5 application screens
- Architected an internal developer diagnostics dashboard using React and Spring Boot that aggregated service health, recent failures and deployment metadata across 12+ backend services, reducing average issue triage time from 25 minutes to under 10 minutes for the engineering team

Software Development Engineer

Jul 2022 – Aug 2023

Netzwerk.AI

Gulbarga, India

- Decomposed 3 high-traffic workflows into independently scalable services, offloading downstream processing through SQS and horizontally scaled workers to isolate failures and increase peak throughput by 2.4 times
- Established CI/CD pipelines with GitHub Actions, Docker and AWS, automating builds, testing, static/dependency/container scanning, artifact publishing and deployment; cut release time from 40 min to 9 min and increased deployment frequency from 2 to 5+ releases/week
- Engineered centralized observability using CloudWatch, Prometheus/Grafana, structured logging, distributed tracing and service-level alerts across application and infrastructure layers; reduced mean time to detect production failures from 18 to 5 minutes and improving root-cause analysis during incident postmortems
- Owned feature delivery across the full SDLC in a lean engineering team, balancing functionality, reliability, security and deadlines to deliver 10+ production features and platform improvements cross functionally

PROJECTS

RAG Chatbot | *Python, Streamlit, LangChain, FAISS*

- Built a document-aware AI chatbot that retrieves relevant context from uploaded PDFs to generate grounded, accurate answers

Coder Buddy | *LangGraph, Groq, Python*

- Designed a multi-agent AI system where specialized agents collaborate to turn a natural language prompt into a working, multi-file codebase

EDUCATION

Northeastern University

Boston, MA

Master of Science in Information Systems

Sep 2023 – Dec 2025

Visvesvaraya Technological University

Belgaum, India

Bachelor of Engineering in Electronics and Communication Engineering

Aug 2018 – Jun 2022
